

Quality Door Panels
from the UK leading supplier

the Shire & City Door range

Shire Door introduction

The Shire Door Panel range is brought to you by one of the industry's leaders. A reputation for high product quality has been gained from the use of only the best materials, coupled with state of the art manufacturing technology and superb service standards.

Total Quality is an ethos which has been actively developed within the company, achieved through team working and constant analysis of improving performance both in product and service.

Architecturally, the entrance door is a key feature in the overall appearance of the house and should be in-keeping with the existing aesthetic styling, especially in older properties. It must also give protection, keeping out unwanted visitors or the worst of the weather.

Choosing the right door is therefore very important, within the Shire Door Panel collection you will find the perfect options. There are sixteen door designs to suit all styles of houses, each incorporates choice of colour, glazing options, insulating core options as well as accessories.

Ayrshire

Ayrshire is steeped in history with links to William Wallace, Robert the Bruce and Robert Burns.

William Wallace 1270-1305, began his rise to fame by operating as an outlaw in Ayrshire. Robert the Bruce 1274-1329, born at Turnberry Castle south of Ayr, became Scotland's legendary King. Robert Burns 1759-1796, Scotland's best known poet, was born in Alloway south of Ayr.

Berkshire

Berkshire has a very rich heritage both culturally and naturally. The buildings, landscapes, habitats, collections and archives that comprise the heritage of West Berkshire include many that are nationally and regionally significant. It represents many of the essential characteristics of the area which contribute to the pleasures of living and working in or visiting Berkshire.

The future of this valuable resource depends on the public understanding and appreciating the heritage and the history that lies behind it - this is critical for its long-term care and well being.

Cheshire

The story of Culture and Heritage in Chester and Cheshire has been a long and eventful one. It's a tale told in many museums across the county explaining how the Romans conquered and built roads and buildings. The county is built on salt which is one of its major resources.

With more than 200 miles of waterways, Cheshire has a greater length of canals than any other English county.

Derbyshire

Evidence of prehistoric existence has been found in the limestone caves at Cresswell Craggs. There are numerous Bronze Age burial burrows and stone circles. It is thought that the origin of Derby may belong to prehistoric times and developed as a strategic point on the River Derwent, where it was possible to cross it by ford. The Derwent was renowned for flooding which made the river impassable and so the travellers and merchants congregated and eventually settled on its banks

Flintshire

Flintshire itself has a long and distinctive heritage. It boasts numerous historic landmarks including industrial and religious sites. It was established in 1284, some seven years after King Edward 1 ordered work to begin on Flint Castle on a site of fierce battles between the Celts and Romans, British and Saxons, Welsh and Normans, which overlooked the Dee estuary. .

Gloucestershire

Gloucestershire is the ceremonial and administrative county in southwest England. The county comprises part of the Cotswold Hills, part of the flat fertile valley of the River Severn, and the entire Forest of Dean.

The county town is Gloucester, and other principle towns include Cheltenham, Stroud, Cirencester, and Tewkesbury. Present-day Gloucestershire borders the preserved county of Gwent in Wales, and in England the ceremonial counties of Herefordshire, Oxfordshire, Worcestershire, Warwickshire, and Wiltshire.

Lancashire

In 1842, Barclay's Complete and Universal Dictionary described Lancashire as "...a county of England, lying on the Irish Sea, and bounded by Cumberland, Westmoreland, Yorkshire, and Cheshire. It is 75 miles in length, and 30 in breadth. It is divided into 6 hundreds, which contain 27 market towns, 62 parishes, and 894 villages.

Oxfordshire

Historically the area has always had some importance, it has been valuable agricultural land resting between the main southern cities and containing the prestigious settlement at Oxford (from the Old English Oxenaforda). Ignored by the Romans, it was not until the formation of a settlement at Oxford that the area grew in importance.

The university at Oxford was founded in 1096. The area was part of the Cotswolds wool trade from the 13th century. Morris Motors was founded in Oxford in 1912 and MG in Abingdon in 1929.

Ulster

In the early 12th century, the Normans, having conquered England, moved into Ireland, marking their progress with fortifications. But centuries passed before the Norman successors, the English, could consolidate their conquest.

Home to some of Ireland's most powerful chieftains, Ulster fought hardest and held out longest. Carrickfergus Castle, the most formidable (and at one stage the only) stronghold on the island, was enlarged several times and saw many a battle and siege.

City Door introduction

The City Collection has been created by synthesizing the myriad of design and cultural influences emanating from the great European Cities.

Recognising that lifestyle in the city is often reflected in design and function; we believe that the City Collection has captured something of the true essence of each European City. The use of strong lead designs for those southern European cities whilst applying subtle glass choices for those cities in the North, typifies this.

Product quality and long-term performance remains the core competency of any successful product. We understand the significant differing performance characteristics required by our products in Europe, the dry heat in the South to the biting cold in the North. We have incorporated this knowledge into the product design, ensuring that the choice will meet expectations.

The City Collection is available in the same wide range of colours, ancillaries, structures and glass options as have been incorporated within the Shire range.

Choices

Textured Glass

Glass Designs

Traditional handcrafted method of applying lead. Available in diamond (D) and square (S)

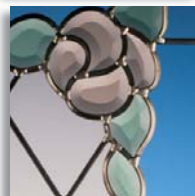

Heritage

Using 'resin' technology to provide bevels or resin 'lead' designs with vibrant colours

Expressions

An ornate mix of glass bevels and traditional lead work

Jubilee

Heat-fused glass at high temperatures

Fusion

Georgian Bar

Notes

1. It is essential for safety and performance reasons that glass is correctly specified and installed. All glass is toughened to BS6206.
2. Glass is also available in 6.4 laminated glass, low emissivity glass and also 'Bronze Anti-sun'.
3. Natural leads will oxidise during their lifetime.
4. The resin bevels contained within the expressions range may occasionally show slight imperfections due to the manufacturing process.

Panel Cores

Notes

1. All door skins can be classified as flame retardant material under group B1, in accordance to DIN4102 Part 1.
2. Core foam materials are HCFC free and contain a fire retardant additive.
3. Due to limitations of the print process all photographs are considered to be only a representation of the actual product.
4. Due to a policy of continuous development, we reserve the right to change any of the patterns or designs without prior notice.
